Answer the following questions:

\_\_\_\_\_ Public System \_\_\_\_\_ Private System Type of Water system that will be used to irrigate

\_\_\_\_\_ Yes \_\_\_\_\_ No Will the irrigation system be connected to the EXTERIOR water service pipe?

\_\_\_\_\_ Yes \_\_\_\_\_ No Will the irrigation system be connected to the INTERIOR water distribution system?

\_\_\_\_\_ Yes \_\_\_\_\_ No Is the Rain Sensor device installed on this system?

Procedure: The Virginia Uniform Statewide Building Code requires that a backflow preventer be installed on each lawn irrigation system. This is to prevent lawn fertilizers, weed killers, and other contaminants from being drawn back into the drinking water system. **An individual certified in installing backflow protection, a licensed plumber, or the property owner must install the backflow preventer.**

**Please Note: The backflow preventer is required to be tested prior to inspection. Reduced Pressure Principal and Pressure Vacuum Breaker Backflow Preventer assemblies shall be tested at the time of installation. Please have a copy of the test available at the final inspection of the irrigation system.**

Signature of Applicant: \_\_\_\_\_
